Weekly Health Report

POWER STATE OF THE PARTY OF THE

No. 89 28 March 1947

Occupied Germany:

In the following Appendices "A", "B", and "C" are summaries of communicable disease cases and deaths by Regierungsbezirk and Land, and case rates by Regierungsbezirk and Land for the week ended 8 March 1947.

Communicable Diseases:

Two cases of smallpox were reported in Wiesbaden, Land Hesse. These cases occurred in the same family as did those previously reported during the weeks ending 15 February and 22 February. Tuberculosis, gonorrhea, and syphilis remain approximately the same. Influenza decreased from 93 cases during the previous week to 54. However, there were four deaths due to influenza reported this week; three in Land Hesse and one in Land Bavaria. In Land Hesse influenza increased from two cases during the previous week to 20. These cases are under investigation at the present time. Diphtheria, scarlet fever, whooping cough, and measles continue their downward trends.
